

Nicola Sawyer graduated from the University of Oxford (UK) with a Master of Chemistry degree in 2005. Following this, she completed a postgraduate Master of Science degree in Human Molecular Genetics at Imperial College London before being accepted into the Clinical Scientist Training Programme with Imperial College Healthcare NHS Trust, specialising in Clinical Biochemistry (2007). After successfully completing the three-year training programme and a Master of Science in Clinical Biochemistry at University College London, she migrated to Australia, and later commenced as a Medical Scientist at PathWest Laboratory Medicine WA in the Clinical Biochemistry department at Royal Perth Hospital in 2011. Between 2015 and 2023, she was the Medical Scientist in Charge of the Royal Perth Hospital Clinical Biochemistry laboratory, and in March 2023, she was awarded the Fellowship of the Royal College of Pathologists of Australasia, Faculty of Science. Since May 2023, she has undertaken a new role as Clinical Scientist at PathWest Biochemistry, Fiona Stanley and Royal Perth Hospitals, with special research interests in cardiovascular disease and endocrine hypertension, particularly the diagnosis and management of primary aldosteronism.
