

Abla Mohamed is a Biomedical Science graduate from the University of Western Australia, majoring in Population Health with a keen interest in Epidemiology and Clinical Research. She's had experience working in a clinic setting as a Pathology Collector for a few years, where she gained valuable phlebotomy skills.

Following this, she worked as a Clinical Trial Assistant on several Early and Late phase studies, collaborating alongside a research team to ensure compliance with ICH/GCP and study protocol guidelines. She has recently joined the team at Dobney Hypertension Centre as a Graduate research assistant, excited to explore her interest in neurovascular hypertension and sympathetic nervous system activation. Abla is eager to learn new techniques and work directly with patients.
