

Sian Tondut completed a Bachelor of Science at Murdoch University in 2012, with a double major in Molecular Biology, Conservation Biology and a Minor in Statistics.

Sian then completed her Honours in Molecular Biology, investigating the effects of Endophytic bacteria and their use into the prevention of *Phytophthora* disease. She was awarded the CRC Plant Biosecurity Scholarship and HAL Plant Biosecurity Scholarship for her project and presentation at the International Plant Pathology conference 2013. Following this, Sian completed her Masters of Nursing Practice at Curtin University, where she graduated in 2017.

On completion of her registration, she was offered a position in the 2017 Graduate Nurse Program in Emergency, at Sir Charles Gairdner Hospital. During her time working within the Emergency Department, Sian completed her Advanced Life Support certificate in 2018. She further fostered her passion for clinical research as a Research Nurse at Linear Clinical Research. Her current role as Research Nurse at the Dobney Hypertension Centre allows her to be patient focused whilst contributing towards important medical research. In her spare time she loves getting lost in a good book and writing short stories.
